I see the value of having a sandbox area for kids to play in but not on the existing parking lot. On a busy summer day people will need to drive down to the ramp to unload all their kayaks, canoes, paddle boards and other water toys.A sand area would be better in a different location. Perhaps near the splash pad.
At the moment the mix of kids running around and people driving around the parking lot is a disaster waiting to happen. Better emergency access is a great idea.
Also the scuba divers have a lot of equipment. The scuba park in Welland is well known among scuba divers in Ontario. A designated drop off area would help solve the traffic problem . Signage for parking and well marked parking spots along the roadway in are needed.
Garbage disposal is always an issue. Bigger and better located garbage cans will help.

Sand beach area would be amazing. Our family really enjoyed the docks and splash pad but with our littlest it was scary on those docks cramped with a ton of others. A safe space for all to enter the water without slipping/jumping would be wonderful.

Is it possible to extend a driveway and small parking lot south of the current parking lot to where the other smaller dock is located.

This area is preferred by the scuba divers using the park and this would ease the congestion in the main parking lot by moving all the scuba divers further south.

Love the idea of hosting Jazz at the site :)
Set a designated "dog beach" away from the area people are swimming (dogs currently swimming on and off leash most often at the ramp area)
How about a covered sand play area near the docks, close to the splash pad?
Splash pad - Add lounge style chairs like near water or benches for parents
Increase number of garbage and recycling bins (weekend overflow on busy weekends)
Is the water tested as they do for other beaches in the area? Post sign indicating when not safe to swim.
Once a day (early am) have city staff pressure wash splash pad to remove duck / goose droppings
